

*Comment for the Master's Course in Fire Science & Technology  
at Tokyo University of Science (TUS) in Japan*

I am **Muhammad** Mamun, a student of Master's Course in Fire Science & Technology under Graduate School of Fire Science & Technology at Tokyo University of Science (TUS), Japan. Basically, I am a Warehouse Inspector in Fire Service & Civil Defence Directorate of Bangladesh. To enhance my professional knowledge and skill, I got myself admitted under this university.

With regard to the academic standard of the course, I am very much honored and proud to be a student of Tokyo University of Science. As, Center of Fire Science & Technology of Tokyo University of Science is considered as one of the legend in the study of Fire Science & Technology in East Asia, It is my immense pleasure to be the part of it. Because of the numerous study and research on fire safety issues under this university, TUS is also known as the *Center of Excellence (COE)* in the field of Global Fire Prevention and Protection.

The modern classroom, student room and other campus facilities enhance enthusiasm among the students. The International Standard Fire Experimental & Testing Laboratory at Noda Campus is a great platform to enrich our theoretical knowledge into practical implementation and for extensive research in this field. The friendly behavior of the skilled professors with strong professional background nourishes the enthusiasm of the students towards study. I express my heartiest gratitude and gratefulness to all concerned of Tokyo University of Science (TUS).
